1. Entity Relationship Diagram (ERD)

2. Data Manipulation Language (DML)

```
public function getData($t, $w = null)
{
    if ($w != null) {
        $this->db->where($w);
    }
    return $this->db->get($t);
}

public function getDataProduk($w = null)
{
    $this->db->select('produk.*, kategori.kategori');
    $this->db->join('kategori', 'kategori.id = produk.id_kategori');
    if ($w != null) {
        $this->db->where($w);
    }
    $this->db->order_by('produk.id', 'asc');
    return $this->db->get('produk');
}

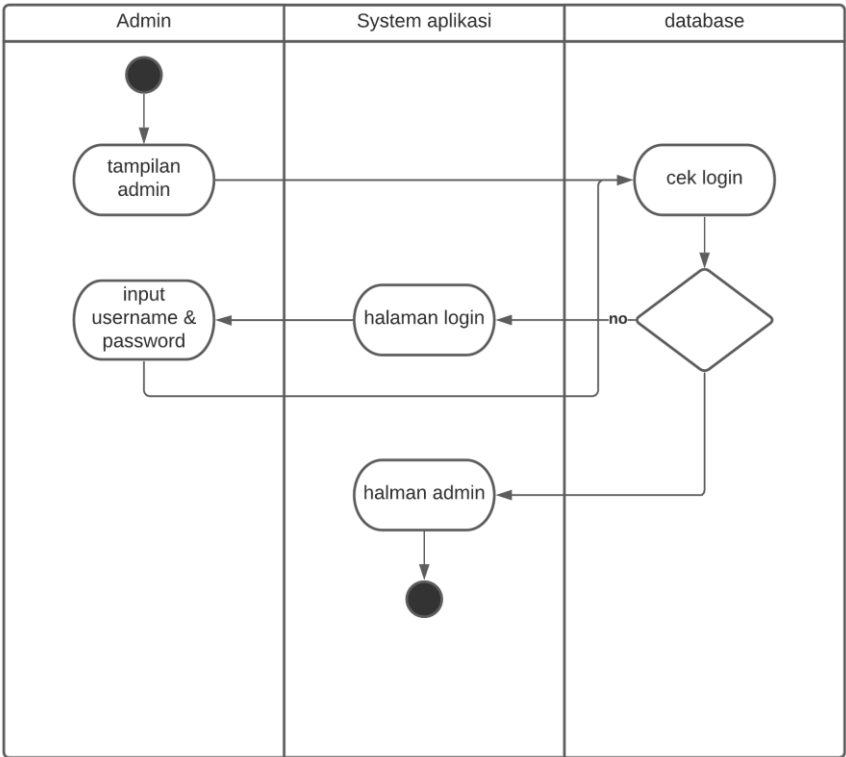

public function ins($t, $data)
{
    return $this->db->insert($t, $data);
}

public function upd($t, $data, $w)
{
    return $this->db->update($t, $data, $w);
}
```

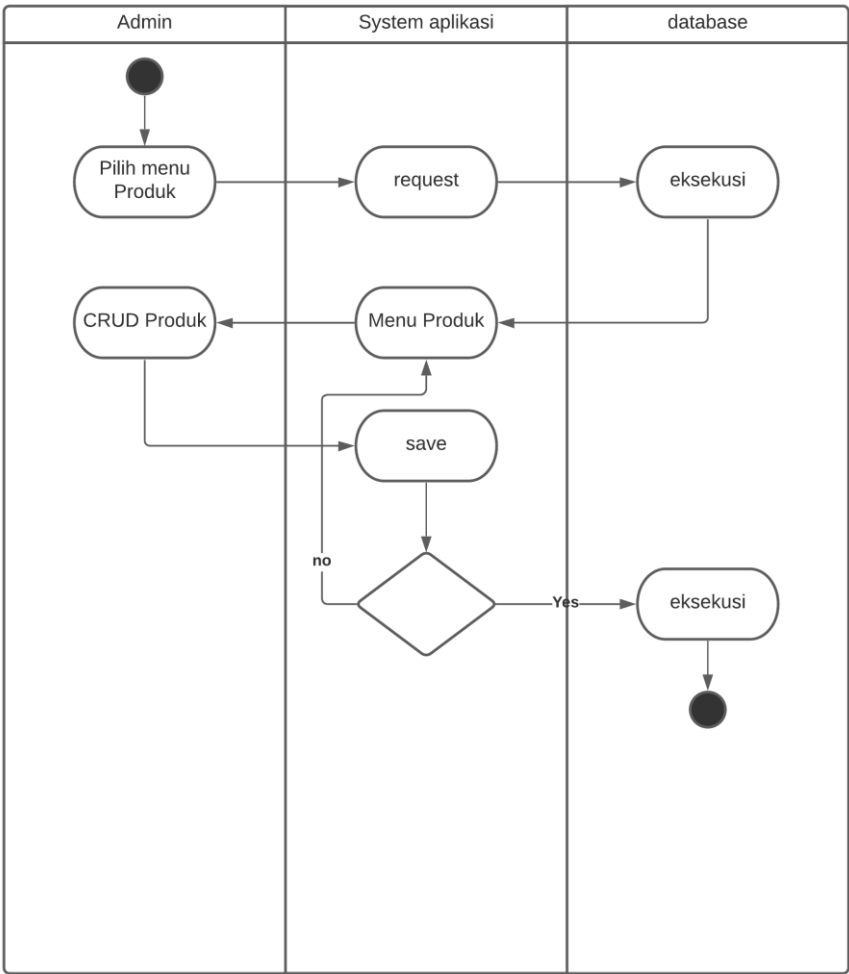

```
public function del($t, $w)
{
    $this->db->where($w);
    $this->db->delete($t);
}
```
